

## Project Planning Phase

### Project Planning Template (Product Backlog, Sprint Planning, Stories and Story points)

Date	18 OCTOBER 2022
Team ID	PNT2022TMID41919
Project Name	Smart farmer-IOT Enabled smart farming
Maximum Marks	8 Marks

#### Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1		US-1	Create the IBM Cloud services which are being used in this project.	6	High	ALFIN BELAN P PRAKASH T
Sprint-1		US-2	Configure the IBM Cloud services which are being used in completing this project.	4	Medium	PRAKASH T ALFIN BELAN P
Sprint-1		US-3	IBM Watson IoT platform acts as the mediator to connect the web application to IoT devices, so create the IBM Watson IoT platform.	5	Medium	PRAKASH T ALFIN BELAN P
Sprint-1		US-4	In order to connect the IoT device to the IBM cloud, create a device in the IBM Watson IoT platform and get the device credentials.	5	High	ALFIN BELAN P PRAKASH T

Sprint-2		US-1	Configure the connection security and create API keys that are used in the Node-RED service for accessing the IBM IoT Platform.	10	High	DHANUSIGA S ALFIN BELAN P
Sprint-2		US-2	Create a Node-RED service.	10	High	DHANUSIGA S ALFIN BELAN P
Sprint-3		US-1	Develop a python script to publish random sensor data such as temperature, moisture, soil and humidity to the IBM IoT platform	7	High	RAHUL S PRAKASH T
Sprint-3		US-2	After developing python code, commands are received just print the statements which represent the control of the devices.	5	Medium	RAHUL S PRAKASH T
Sprint-3		US-3	Publish Data to The IBM Cloud	8	High	RAHUL S PRAKASH T
Sprint-4		US-1	Create Web UI in Node- Red	10	High	DHANUSIGA S RAHUL S PRAKASH T
Sprint-4		US-2	Configure the Node-RED flow to receive data from the IBM IoT platform and also use Cloudant DB nodes to store the received sensor data in the cloudant DB	10	High	DHANUSIGA S RAHUL S PRAKASH T

**Project Tracker, Velocity & Burndown Chart: (4 Marks)**

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022	20	05 Nov 2022
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022	20	12 Nov 2022
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022	20	19 Nov 2022

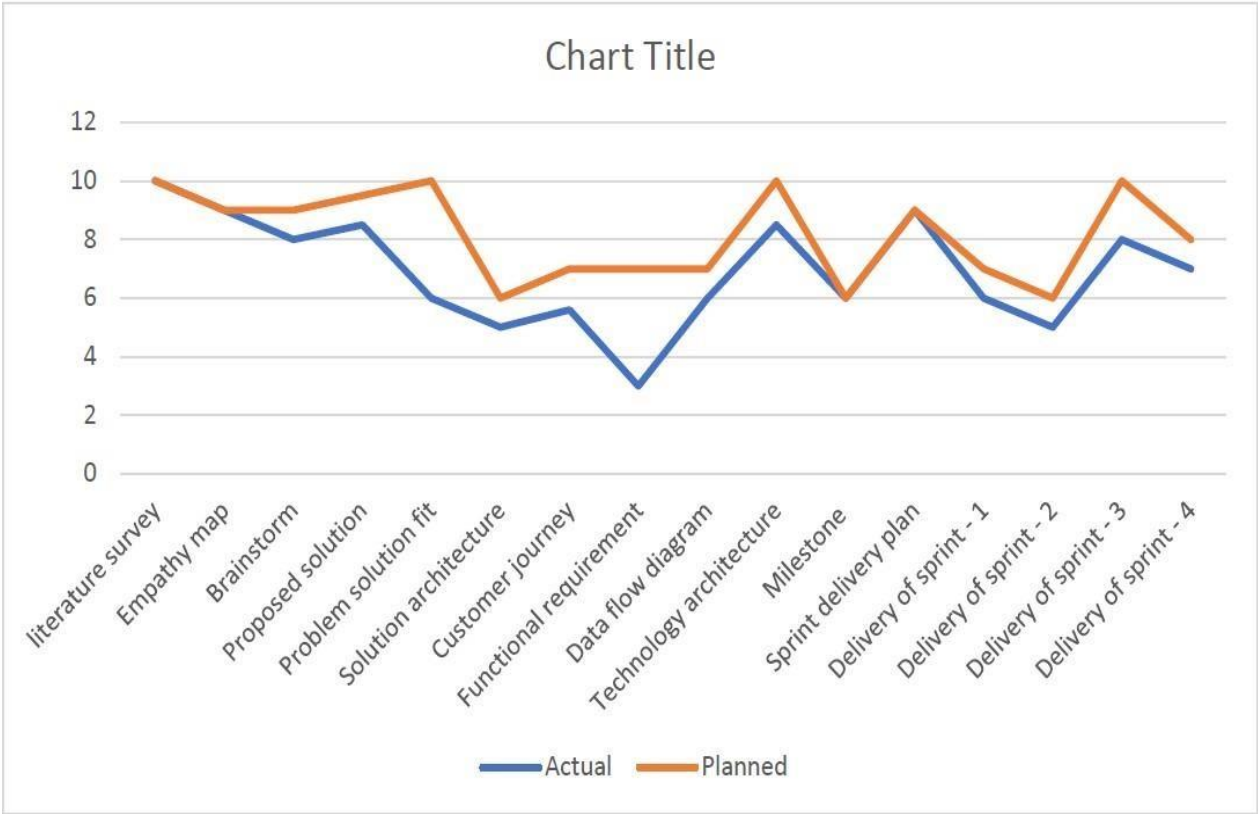

**Velocity:**

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

**Burndown Chart:**

A burndown chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as

Scrum. However, burndown charts can be applied to any project containing measurable progress overtime.
